Process of phytosanitary inspection and release of the consignments

On receipt of application for quarantine inspection and clearance of food grain from importer or his clearing agent, the application is registered. Documents viz., original import permit, original phytosanitary certificate, bill of entry, certificate of origin, bill of lading, invoice etc. are checked. After scrutiny of the application, an inspector is deputed for drawing samples as per laid down procedure. No. of Containers sampled depends on size of the consignment, as under:

01-10 containers - Minimum 2 containers

11-25 containers - One in every five containers but not less than four

Above 25 containers - One in every eight Containers but not less than six containers,

Two samples of one Kg each are drawn from each container for inspection / testing. Each sample is examined for freedom from the quarantine pest. If the consignment has live insect infestation, the importer is advised to fumigate the consignment with Methyl Bromide under the supervision of Plant Quarantine Officer. The consignment is again inspected and if found to have no live insect infestation, it is approved for release.

As per the Plant Quarantine (Regulation of Import into India) Order, 2003 all pulses are required to be treated with Methyl Bromide prior to entry into India. However, in respect of imports of pulses from USA, Canada and France interim arrangements have been made for Methyl Bromide fumigation at the point of entry, keeping in view the fact that this treatment is not feasible in these countries owing to very low temperature.

In case of non compliances with conditions stipulated in Plant Quarantine (Regulation of Import into India) Order, 2003, the consignment would be released after realizing fee for import permit and fee for plant quarantine inspection at five times of the normal rates and prescribed treatment. The fee applicable for first 1000 Kg is Rs. 2500/- plus Rs. 50/- per additional tonne in case of pulses.
